Task Analysis – Bus Booking System

Task Analysis is the process of breaking down a user's interactions with a system into smaller, manageable steps to understand how users achieve their goals. It helps in identifying user needs, pain points, and areas for improvement.

Key Aspects of Task Analysis:

- Understanding what tasks users perform in the bus booking system.
- Identifying the sequence of actions required to complete ticket booking.
- Analyzing user pain points such as payment failures or cancellation issues.
- Defining system requirements to improve user experience and efficiency.

User Flow – Bus Booking System

User Flow is a visual representation of how users navigate through the bus booking application to complete ticket booking. It shows the steps users take from entering trip details to booking confirmation or cancellation.
